

P2204 FOUR CHANNEL The key to making electronic scales simple.

The First Truly Self-Diagnostic Indicator with On-Screen Programming
Display Truck, Trailer and Total weights at the same time

Designed for flexibility, the P2204 Weight Indicator is the latest technology in on-board scale electronics for the trucking industry. It can be easily modified to meet the needs of changing system requirements.

The five user soft keys allow you to produce key functions that are unique to your application.

The P2204 four channel indicator is designed for versatility. The P2204 can easily be programmed for two, three or four channels. Use it on a standard 2 channel logger, a three channel "B" train or a four channel Northwest short logger. The P2204 indicator retains the calibration information of all four channels which makes it very easy to switch from a long logger to short logger without having to re-enter any calibration information. The P2204 is extremely reliable and easy to operate.

- Four channel models for long and short loggers, B-trains and chip vans.
- Super-Bright, .6" high, red, seven segment LED display.
- Two-wire, non-polarity sensitive, digital technology provides ultimate reliability.
- An Advanced Calibration function for calibrating the scale without a load.
- Simple diagnostics allow each system component to be quickly checked from the cab.
- Capable of monitoring individual load cell outputs.
- Quick switching from GROSS to NET and quick TARE RESET.
- Compatible with all models of On-board scale load cells and sensors.
- Can drive up to 16 load cells or transducers.
- **100% Compatible with 9100QC.**

Complete Conversion Kit:

- | | |
|------------------------------|--------------------------------|
| (1) P2204 Meter | (2) 216-80, 80ft Trailer cable |
| (4) PNT 7042 Transmitter | (2) 216-35, 35ft Truck cable |
| (1) 218-15, 15ft Power cable | |
