

RF Long Logger System

The logging systems include the innovative PNT 9700 Weigh indicators. The CableLink Wireless System allows you to eliminate the potentially troublesome long cable from the trailer reach cable to the meter.

The load cells are machined from high-alloy steel, heat treated for maximum strength, and then tested to a 300 percent overload capacity. The sensing elements in the double-gaged steel shear-beam load cells feature full-twist compensation and are fully encapsulated to withstand the harshest environmental conditions. Accuracy 1% of net payload and easy to operate.

RF Long Logger Full System #79702RF

- (1) 9700 Indicator (2-Channel)
- (2) 7042 Transcoders
- (1) 216-35 35 ft Truck cable
- (1) 216-80 80 ft Trailer cable
- (1) 218-15 15 ft Power cable
- (4) 532623 26" Accu-Beam Load Cells
- (4) 2050 26" Load Cell Mounting Kits
- (1) 601 RF Transmitter
- (1) 602 RF Receiver
