Trailer-Only Air Ride Scale System with Dual Ride-Height Control Valve

The Digital Air Scale system from PNT is economical and easy to install. It can be used on most truck and trailer air suspensions, allowing the operator to monitor the weight of axle groups or gross vehicle weight at the touch of a button. Despite their surprising affordability, the system is highly stable and accurate to within 2% of Gross Vehicle Weight (GVW).

Rugged temperature and altitude-compensated corrosion-resistant sensors, used in conjunction with the time-proven Pacific Northwest Technologies ConxLink connection system, give "best in the industry" protection against moisture, corrosives, and other harsh environmental conditions. Let the PNT Digital Air Scale system reduce your truck maintenance, save loading and unloading time, avoid trips to commercial scales, and protect you from over-weight fines.

 Dual Port Digital Air Sensor

98052 Dual Port Digital Air Sensor

Trailer-Only Ride Scale System with Dual Ride-Height Control Valve

- (1) 98052 Dual Port Digital Air Sensor
- (1) 216-40 40 ft Trailer cable
- (1) 20-xxxx Ride Height Control Valve (Optional)
